Nationale Strategie gegen Krebs - Bericht an Kerngruppe zum Projekt *5.2.2 Nachwuchsförderung klinische Forschung*

Flurina Hoffmann (SAKK)
Bern, 17. März 2020

Stand der Arbeiten / Fortschritte

- 3 courses successfully completed, 4th round started in January 2020
- All participants are very happy and the mentors are mostly impressed
- February 2020: 9 participants out of 18 applications were selected for the Young Oncology Academy 2020
- New for 2020: 9 Participants and 8 Mentors, before 7 Mentees, 7 Mentors
- Until 2019 the program was only for medical oncologists, hematologists and radio-oncologists. New in 2020: the application is open for interested residents in the field of urology, gynecology and dermatology. It is planned to include the fields pathology and surgery in 2021
- For the first time, in November 2019 we invited the former participants of the young oncology academies. A few participated at the Semi-Annual presentations of the YOA. In a survey everyone was very positive about an alumni club, and we plan to include this exchange platform in the YOA 2021
- The Mentees of the YOA 2020 will visit a phase I study center as a new course

Kritische Faktoren / Probleme

- Zur Finanzierung des erweiterten Programms wird ein zusätzlicher Sponsor angefragt (Antwort noch ausstehend) – Stand 2019
 - Janssen ist der neue, vierte Sponsor der Young Oncology Academy
